Latinos, Substance Use, and Treatment

- 54 million Latinos in the U.S.
 - 1/3 under the age of 18
- Higher rates of substance use disorders (14%)
 - White (12.7%)
 - African American (7%)
- Standard versions of EBTs for substance use disorders
 - were not developed or designed for Latinos
 - not extensively examined for Latino adolesscents

Benefit from Culturally Adapted?

- Compared to treatment-as-usual or standard (i.e., nonadapted) version of <u>another</u> of treatment
 - appear to benefit but results are mixed
- Compared to a standard (i.e., non-adapted) version of the same treatment
 - benefits moderated by cultural variables
- Look at prior webinar for more information (Feb, 2015):
 - Central Rockies ATTC webpage, click on Special Topics, scroll down for "Culturally Adapted....."

What is the CAM-SAT?

 Cultural Accommodation Model for Substance Abuse Treatment (CAM-SAT)

Four Stages:

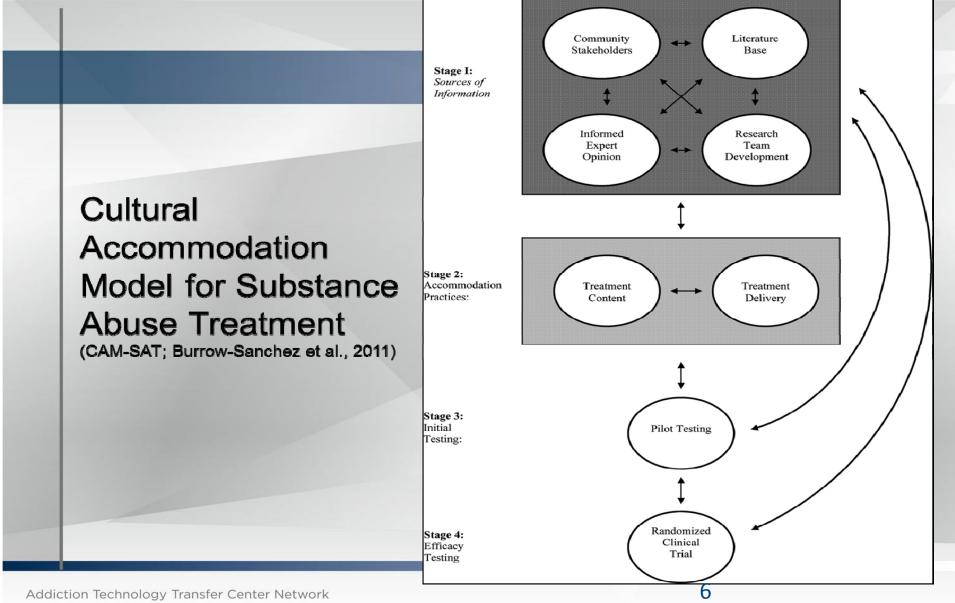

- Sources of Information
- **–** Accommodation Practices
- Initial Testing
- Comparative Testing

Overview of VIDA Study

- Study 1: Focus Groups
 - Goal: development of culturally accommodated treatment
- Study 2: Pilot Study, 35 Latino Adolescents
 <u>Goal</u>: feasibility testing
- Study 3: Randomized Clinical Trial, 70 Latino Adolescents
 - Goal: test of intervention efficacy

Central Rocidee (HH8 Region 0)

VIDA: Studies 2 and 3

- Treatment
 - Standard Cognitive Behavioral Treatment (S-CBT)
 - Cognitive-Behavioral Coping Skills Therapy Manual (Kadden et al., 1992)
 - Accommodated Cognitive Behavioral Treatment (A-CBT)
 - Integration of cultural elements into treatment content and delivery (Burrow-Sanchez et al., 2011)

• Delivery

- Small group-based (6-10 adolescents)
- $-1\frac{1}{2}$ hour weekly sessions over 12 weeks
- Community Center
- Bilingual doctoral student therapists

Sources: Burrow-Sanchez & Wrona, 2012; Burrow-Sanchez et al., 2015

VIDA: Outcomes for Study 3

- Retention:
 - 73% treatment completion and 84% T2/T3 assessments
 - 67% for S-CBT and 79% for A-CBT (Tx Comp)

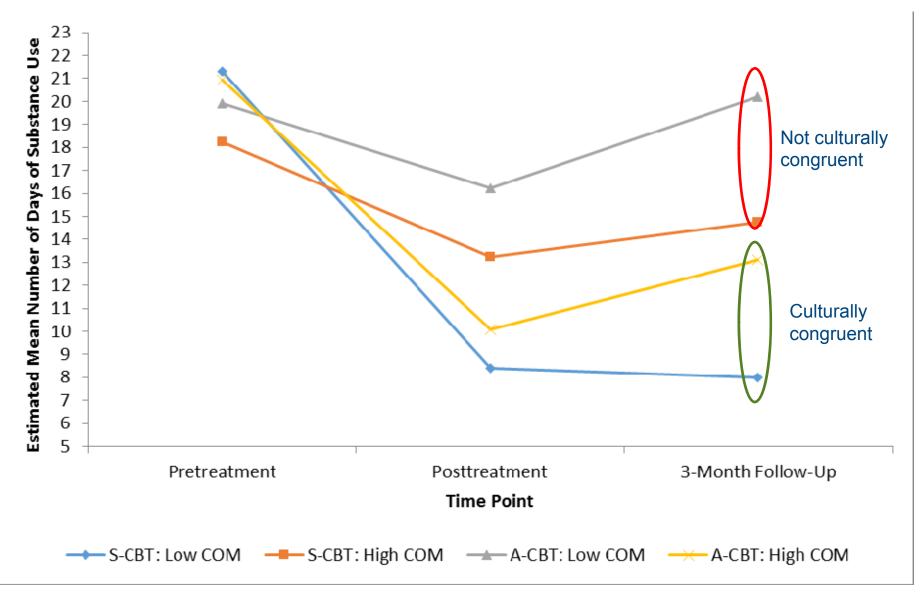

<u>Attendance</u>:

- S-CBT=<u>10.42</u> (SD=1.14); A-CBT=<u>10.59</u> (SD=1.05)

Substance Use Levels:

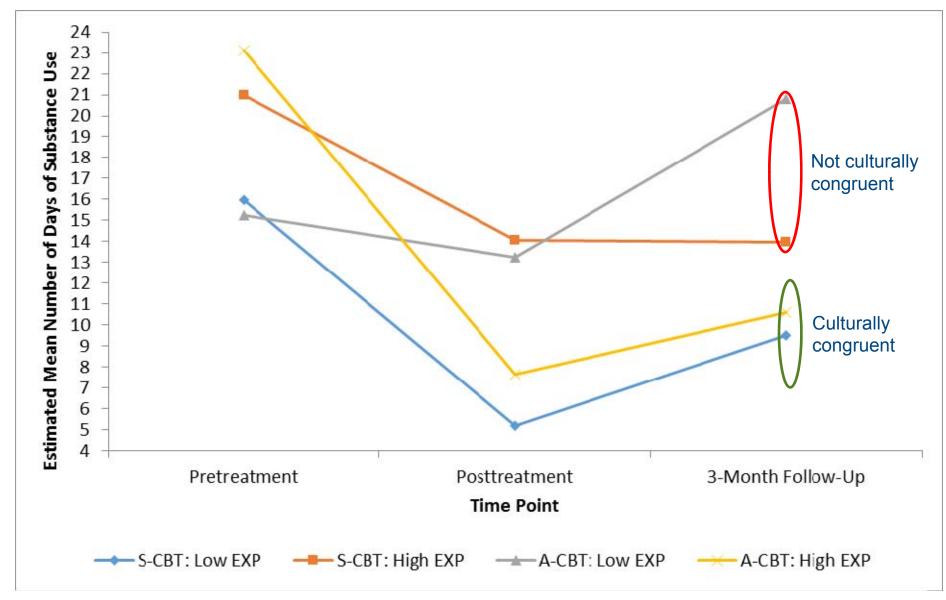

- Time: decrease in substance use across time for both group
- Time by Group: change in substance use was not different by group across time
- Moderators: change in substance use across time was moderated by cultural variables

Commitment Moderator

S-CBT = Standard Cognitive-Behavioral Treatment; A-CBT= Accommodated Cognitive-Behavioral Treatment; COM = Commitment subfactor of ethnic identity. 19

Exploration Moderator

S-CBT = Standard Cognitive-Behavioral Treatment; A-CBT = Accommodated Cognitive-Behavioral Treatment; EXP = Exploration subfactor of ethnic identity 20

Central Rockies (HHS Region 6)

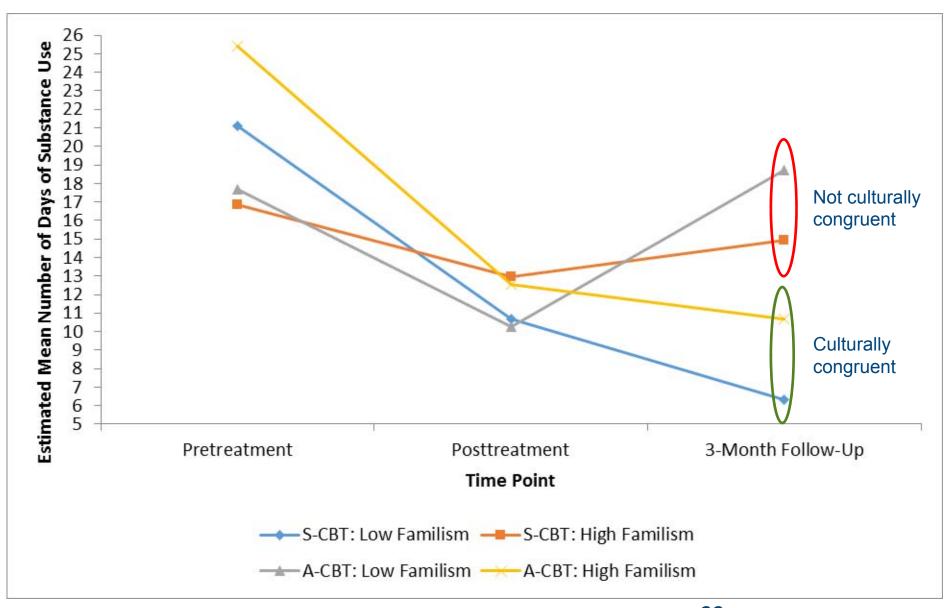

Addiction Technology Transfer Center Network Pathology Biddeen Abas and Redal Halls Brabes Addictions

Major Points for Ethnic Identity

- Substance use outcomes were <u>better</u> when: Ethnic identity and treatment were <u>culturally congruent</u>
 - Low ethnic ID and standard treatment
 - High ethnic ID and adapted treatment
- Substance use outcomes were <u>worse</u> when: Ethnic identity and treatment were <u>not culturally congruent</u>
 - Low ethnic ID and adapted treatment
 - High ethnic ID and standard treatment

Source: Burrow-Sanchez et al., 2015

Familism Moderator

S-CBT = Standard Cognitive-Behavioral Treatment; A-CBT = Accommodated Cognitive-Behavioral Treatment.

Central Rockies (HHS Region 0)

Addition Technology Transfer Center Network Packs by Schlass Alexand Haddi Halb Brobs Addition

Major Points for Familism (Parent)

- Substance use outcomes were <u>better</u> when: Familism and treatment were <u>culturally congruent</u>
 - Low familism and standard treatment
 - High familism and adapted treatment
- Substance use outcomes were <u>worse</u> when: Familism and treatment were <u>not culturally congruent</u>
 - Low familism and adapted treatment
 - High familism and standard treatment
