

2015 Behavioral Health Webinar

Series Theme: Recovery Orientated Systems of Care

The series features state of the art, evidence-based information from the foremost experts in the country presented every 4th Wednesday of the month for 90 minutes.

Each topic will emphasize how it works within Recovery Orientated Systems of Care (ROSC). Recovery-oriented care seeks to improve outcomes by networks of formal and informal services developed and mobilized to sustain long-term recovery for individuals and families impacted by severe substance use disorders. ROSC is not a treatment agency, but a macro level organization of a community.

Wisconsin Focus: Wisconsin's Bureau of Prevention, Treatment and Recovery (BPTR) staff will present Wisconsin's context for each topic to reiterate the direction they're moving towards for their provider network.
